

# Medisoft 15 System Requirements

---

**Workstation System Recommended Requirements:** Pentium 4 2.6Ghz processor or higher, 1GB of available hard disk space, 512MB of RAM, 16+ color display, Windows 2000 Professional or Windows XP Professional.

**Workstation System Minimum Requirements:** Pentium III – 500+ MHz processor, 500MB available hard disk space, 256MB RAM, 256 color display, Windows 2000 Professional or Windows XP Professional

**Server System Recommended Requirements:** Pentium 4 2.6Ghz processor or higher, 2GB of available hard disk space, 1GB of RAM, 16+ color display, Windows 2000 Server or Windows 2003 Server.

**Caveat on Windows Vista Business Operating System.** When purchasing Windows Vista Business, there are two versions – the 32-bit or 64-bit operating system. Since Medisoft is based on a 32-bit operating system, it will work on the Vista Business 32-bit operating system only. *Please do not attempt to install Medisoft on the 64-bit operating system.*

**Note:**

- The 256 color display minimum supported may limit some features, so a 16-bit or higher is recommended.
- We develop and test on the most current release of the above-mentioned operating systems.
- These recommendations are for the most current releases.
- Novell NetWare is not supported with Medisoft Version 14.
- XP Home version is not supported.
